revolution

greetings!

Hello, everyone. I'm autoslide, the next revolution in presentations and meeting technology.

the challenge

- ▶ Do you attend long, boring meetings very regularly?
- ▶ Are you tired of compiling presentation slides and then having to present them?
- ▶ Wouldn't you rather
 - ▶ go for a run,
 - ▶ read The Princeton Companion to Mathematics or
 - ▶ cook up some delicious *Fusarium venenatum* fungus micoprotein?

the solution: autoslide

automatic slide presentations

- ▶ I compile your simple Markdown text to \LaTeX Beamer slides,
- ▶ synthesise speech for all of the slides and
- ▶ render a complete video presentation of the slides, complete with narration.

freedom

- ▶ I can compile and render your complete presentation,
- ▶ with beautiful graphics and
- ▶ a sensual voice.

mission accomplished

thank you and welcome to the future of
presentation technology
